

DEDICATED TO DISCOVERY.

Strategic | Disciplined | Responsible | Committed

Corporate Presentation | May 2024

Cautionary Notes

This document has been prepared by Coppernico Metals Inc. (the “Company”) to showcase the Company’s mineral exploration projects. Because it is a high-level summary presentation, the information contained herein cannot contain all the information that should be reviewed before making an investment decision.

SUMMARY OF CAUTIONARY NOTES:

- Forward-looking statements are inherently uncertain;
- Canadian mineral disclosure differs from US mineral disclosure;
- See full disclosure records for Coppernico at www.sedarplus.ca – some information may be found under the Company’s former name, Sombrero Resources Inc., or the predecessor company, Auryn Resources Inc. (now Fury Gold Mines Limited).

Tim Kingsley (VP, Exploration), CP. Geo, is a Qualified Person who assumes responsibility for the technical contents of this presentation.

Track Record of Monetizing Exploration Success

KEEGAN RESOURCES

2008 – 2010 (now Galiano Gold)

PRODUCING

Discovery of over **five million ounces** with favorable market conditions

CAYDEN RESOURCES

May 2013 – September 2014

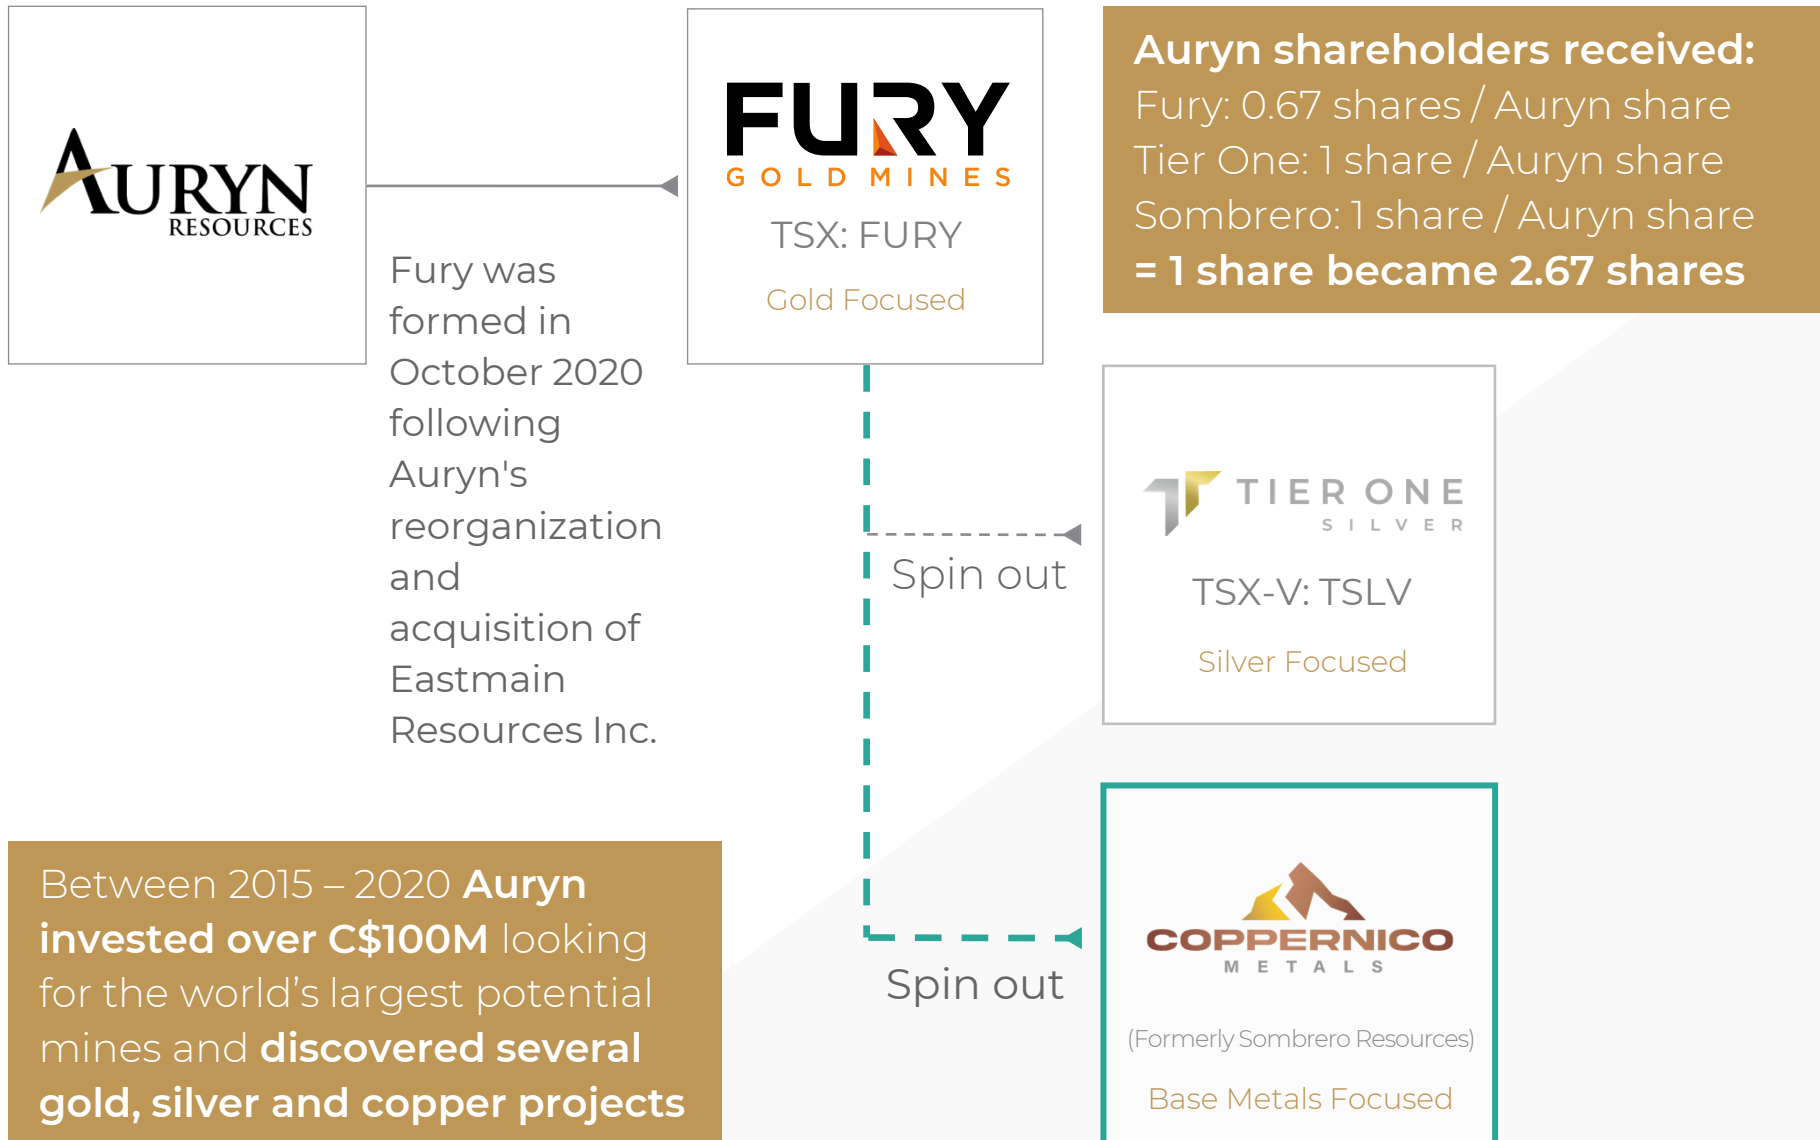

TAKEOVER

100 discovery holes led to Agnico Eagle Mines takeover in 2014 (sold for C\$205M) with challenging market conditions

A discovery-focused management team

Coppernico was Spun Out of Auryn

Our Vision

Become a top-tier discoverer of **high-quality copper focused assets**.

To extend a world-class mining trend through **disciplined innovative proven exploration concepts**.

We are aligned with the communities in which we operate, their future and the environment.

“Coppernico differentiates itself as an exploration company with its flagship Sombrero Project and its **pipeline of scalable, drill-ready, high-quality copper-gold exploration targets** which are **analogous to multiple major mines** nearby in Peru.

Chair & CEO Ivan Bebek

Achieving Key Milestones

Recent Milestones

- ✓ **Completed a social access agreement, valid for 3 years**
November 27, 2023
- ✓ **Appointed Keenan Jennings, former VP Metals Exploration at BHP to the board**
January 17, 2024
- ✓ **Commenced surface work ahead of drilling**, fostering employment opportunities with the communities
- ✓ **Receipt of final drill permits to drill 49 holes from 38 pads –**
April 24, 2024

90-Day Outlook

- **Fund drilling** (April)
- **Announce drill plan** (underway)
- **List Coppernico** on a recognized stock exchange (May/June)
- **Commence inaugural drill programs** at Sombrero once listed (June/July)

Committed Team of Experienced Professionals

MANAGEMENT

Ivan Bebek
Co-Founder, Chair & CEO

- **>24 years' experience** in financing exploration, foreign negotiations and M&A
- Formerly President, CEO & Co-founder at Cayden Resources (sold to Agnico Eagle for C\$205M) Former Exec Chair of Auryn Resources & Co-founder Keegan Resources

Stacy Rowa CPA, CA
CFO

- **>18 years' experience** in accounting, auditing and corporate finance
- Was CFO at Auryn Resources (predecessor company)

Christian Rios M.Sc., P.Geo.
SVP, Corporate Development

- **>23 years' experience** in exploration, development, operations and communities
- Directly involved in the discovery of the Santa Ana and Corani deposits at Bear Creek

Tim Kingsley MSc, CP.Geo
VP, Exploration

- **>19 years' experience** in precious and base metal exploration and project development
- Track record in brownfield exploration and increasing mineral resources at Trevali Mining

DIRECTORS*

Ivan Bebek Co-Founder, Chair & CEO >24 years
Financing Exploration, Foreign Negotiations and M&A

Antonio Arribas PhD >37 years
Mineral Exploration Experience Across Multiple
Companies and Regions

Keenan Jennings M.Sc., MBA >30 years
Experience In Exploration, Project Evaluation,
Mine Development And Production

Marie-Hélène Turgeon M.Env., ICD.D, P.Geo >22 years
ESG, Environmental Management, Legal Compliance
and Stakeholder Engagement

Jeffrey Mason CPA, CA, ICD.D >35 years
Extensive experience in Corporate Finance in precious and base
metals projects in the Americas, Asia and Africa

Gordon J. Fretwell LLB >32 years
Corporate And Securities Law

*All directors are independent aside from Ivan Bebek who is non-independent

Experienced South American Exploration Team

Tim Kingsley M.Sc., CP.Geo
VP, Exploration

- >19 years' experience in precious and base metal exploration and project development
- Track record in brownfield exploration and increasing mineral resources at **Trevali Mining**

Antonio Arribas PhD
Independent Director

- >37 years' experience as a world-renowned gold, copper and silver deposit specialist
- Formerly VP, Geosciences at **BHP**, and held senior roles at **Newmont** and **Placer Dome**

Christian Rios M.Sc., P.Geo.
SVP, Corporate Development

- >23 years' experience in exploration, development, operations and communities
- Directly involved in the discovery of the Santa Ana and Corani deposits at **Bear Creek**

Keenan Jennings M.Sc., MBA
Independent Director

- >30 years' experience in exploration, project evaluation, mine development and production
- Formerly VP, Metals & Exploration at **BHP**, and held senior roles at **Rio Tinto** and **Anglo American**

Henry Aliaga
Principal Senior Geologist

- >20 years' experience across all stages of mineral exploration and mining operations
- Held key roles at major companies: **Minera Antamina, South-West Mining, Buenaventura**

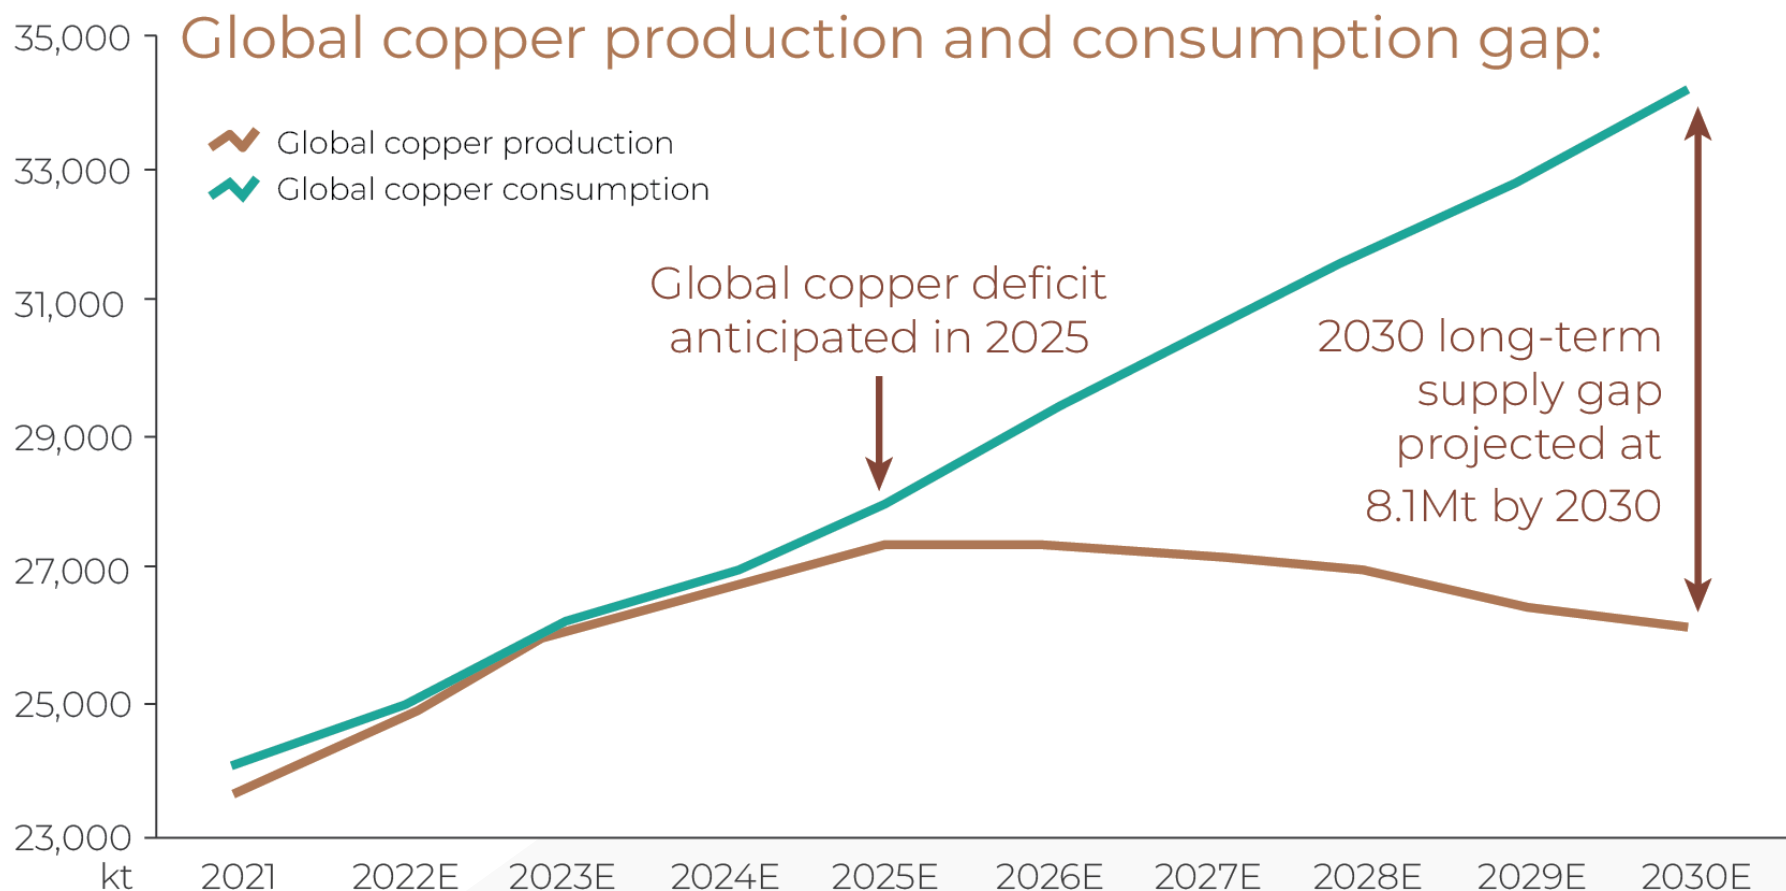

Experience with **globally significant discoveries**

Excellent access to **global geological experts** as needed

Copper Demand Outlook Has Never Been Stronger

"Copper demand is expected to more than double from 25 million metric tons ("Mmt") in 2021 to 53Mmt in 2050 according to an S&P Global report."

COPPERNICO METALS/9

Pursuing High-Quality Large-Scale Discoveries in Peru

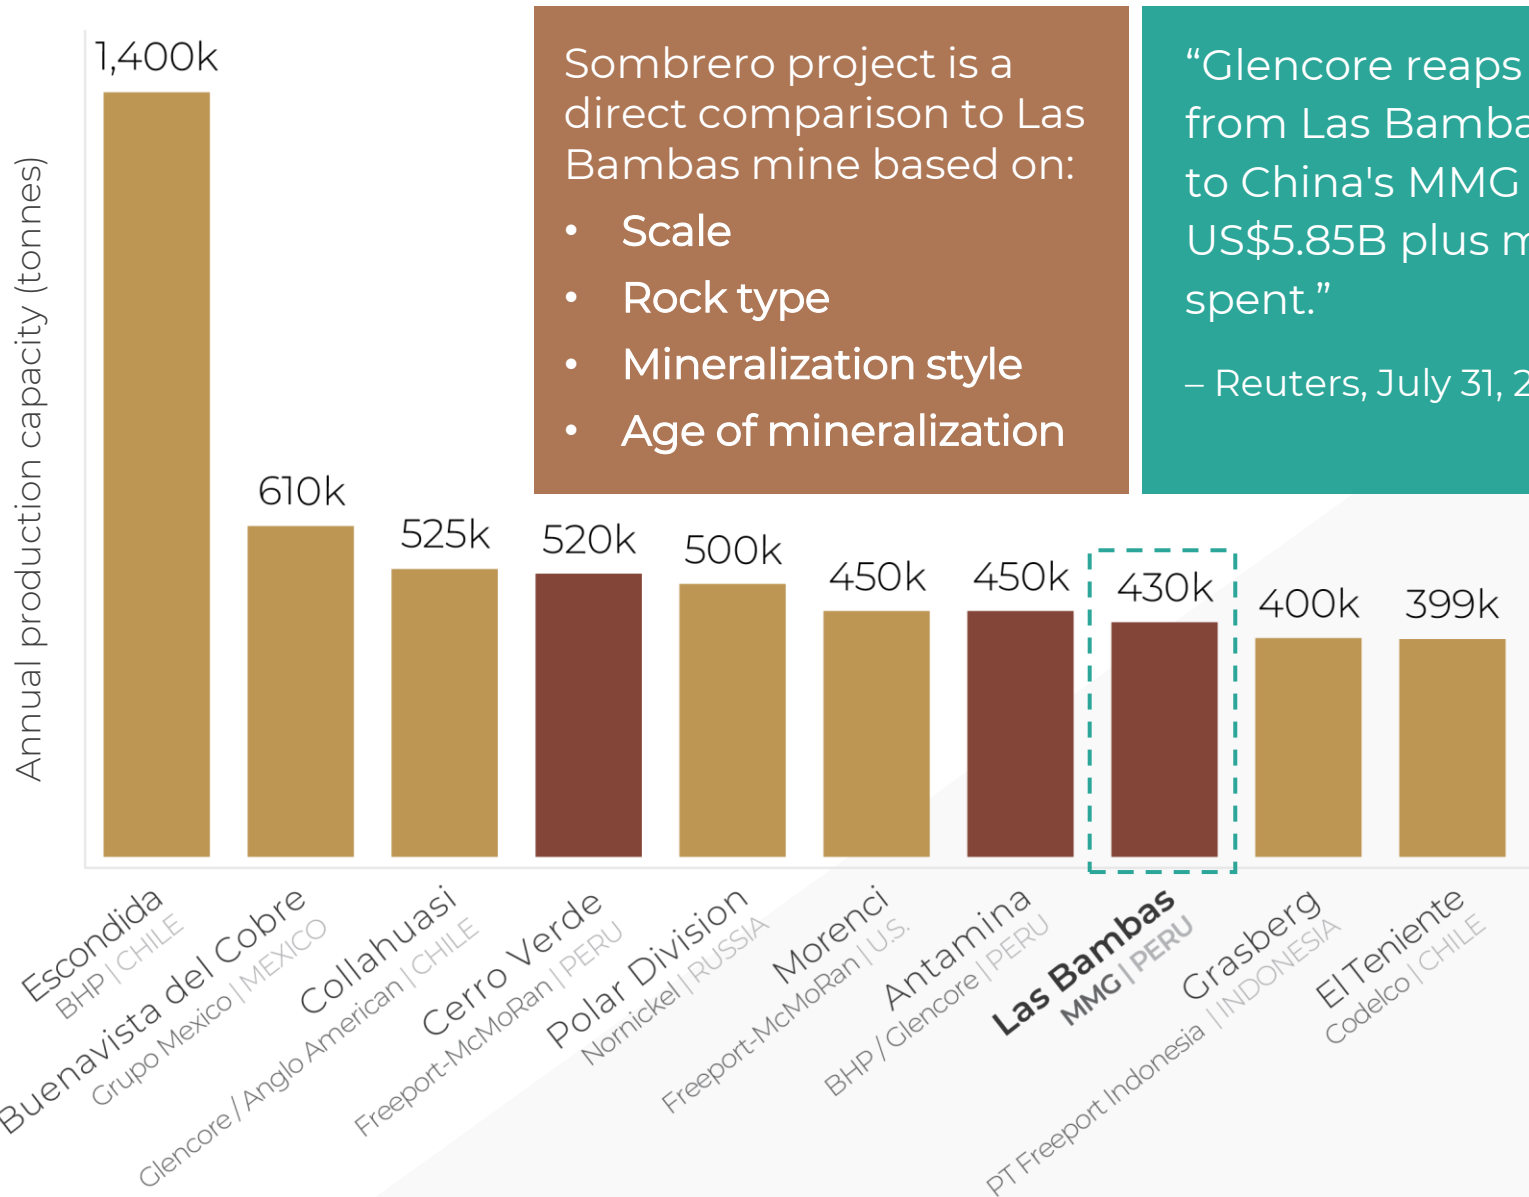

Our goal is to extend the world-class copper-gold skarn and porphyry Andahuaylas-Yauri mining belt through discoveries.

Prioritizing **safety, community and the environment** at all times.

Initial drill targets analogous to Las Bambas Mine

WORLD'S LARGEST COPPER MINES

Sombrero project is a direct comparison to Las Bambas mine based on:

- Scale
- Rock type
- Mineralization style
- Age of mineralization

“Glencore reaps US\$7B from Las Bambas sale to China's MMG – US\$5.85B plus money spent.”

– Reuters, July 31, 2014

Companies listed reflect majority mine ownership

Collaborating with Communities for over 7 Years

Genuine partnerships with local communities

Peruvian community team has extensive background and experience in collaborating with local communities in the central southern part of Peru

One technical specialist in animal health

One full Quechua speaker and agricultural engineer

Social field leader, Jose Pino, is a specialist in Agroideas Business Plan

Implementing Sustainable Positive Benefits

Coppernico is sponsoring applications for an additional US\$4M of government-funded agriculture programs

Australian Lamb Breeding Program

Extension of Andahuaylas-Yauri Mine Belt

Sombrero hosts multiple scalable high-quality discovery opportunities

Highly underexplored – never been drilled for copper and gold

Direct analogues to nearby major mines

Discovered Through Erosional Windows

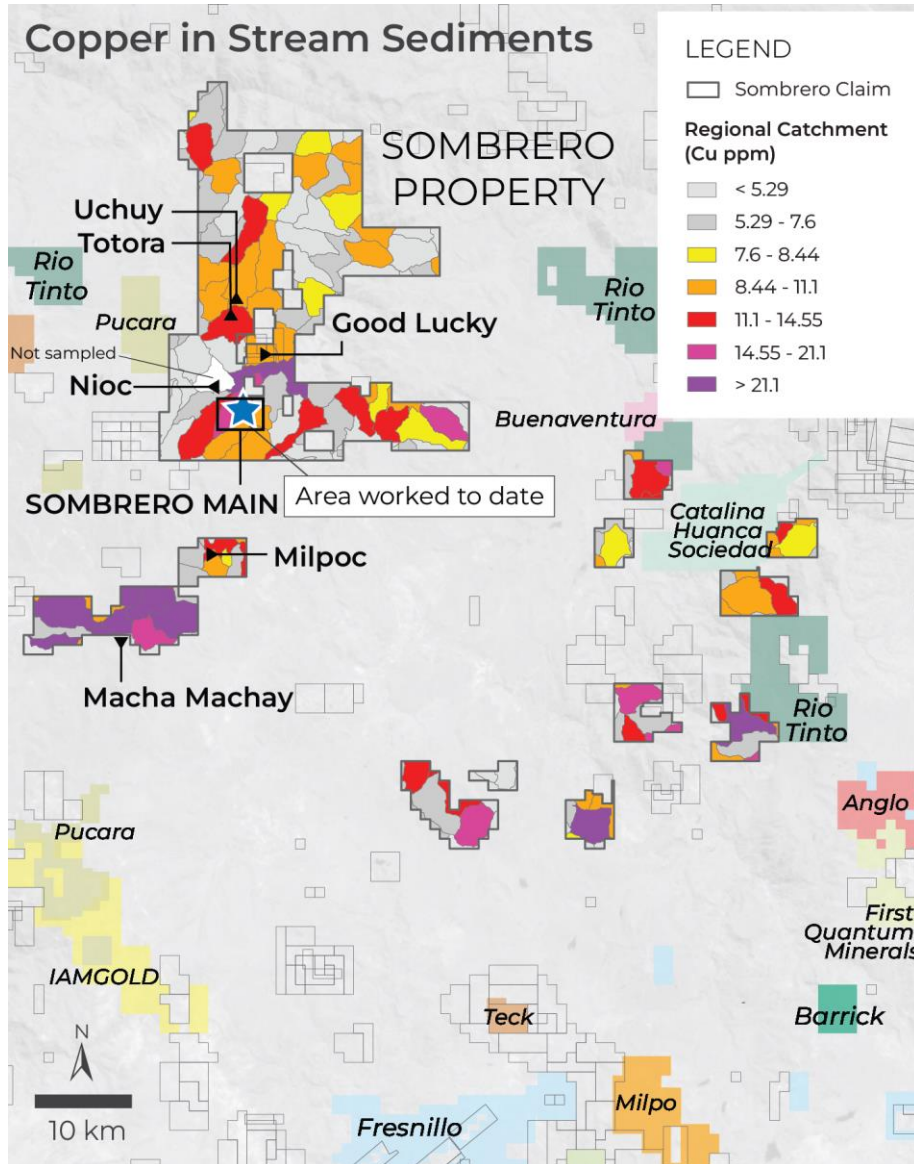

Sombrero Project: Timeline

2001	Aceros Arequipa, Peru's largest steel maker, carried out bulk sample testing at Fierrazo
2007 – 2008	Alturas Minerals completed localized mapping, sampling and geophysics
2013	Aceros Arequipa completed 8 holes for 988 m drilling at Fierrazo, targeting iron mineralization
2015 – 2016	Auryn geologists recognized that the Andahuaylas-Yauri belt continues under volcanic cover at Sombrero; skarn and porphyry mineralization in erosional windows prove the concept
2016	Auryn acquired Sombrero Main claims and carried out prospecting, claim expansion and stream sediment sampling program
2018 – 2020	Auryn carried out mapping, geochemistry, geophysics, age dating and target generation
2023	Received Social Access Agreeent
2024 – onward	Coppernico to define, rank and test targets at its land position in the potential western extension of the belt

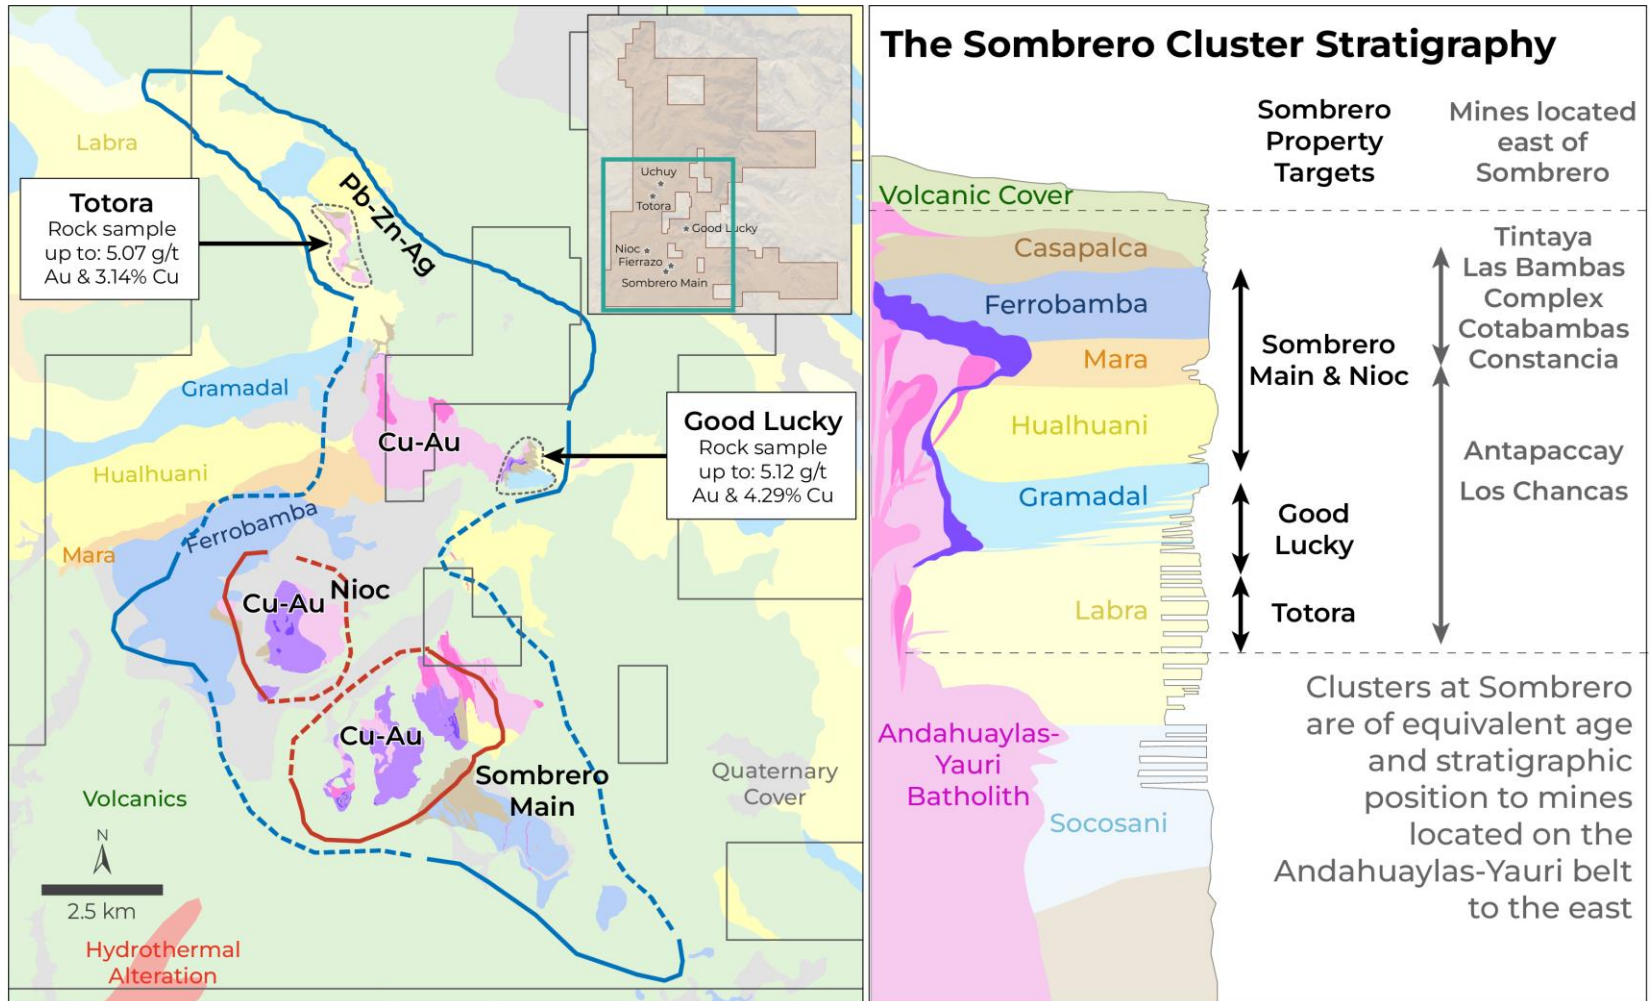

Large Highly Prospective Land Position

Drill-ready. Project Land Position = approx. 100,000 hectares

Sombrero: Cluster Geology & Stratigraphy

- Significant metal endowment
- Large geochemical footprint (~18 km x 6 km)
- Multiple prospective skarn horizons

LEGEND

Alteration	Lithology	Cu-Au	Zn-Pb
Skarn Alteration	Intermediate Intrusion	ICP Mapped (Au > 3ppb)	pXRF Mapped (>2.5x background (Zn > 98ppm))

Multiple Eocene-dated Mineralized Intrusions

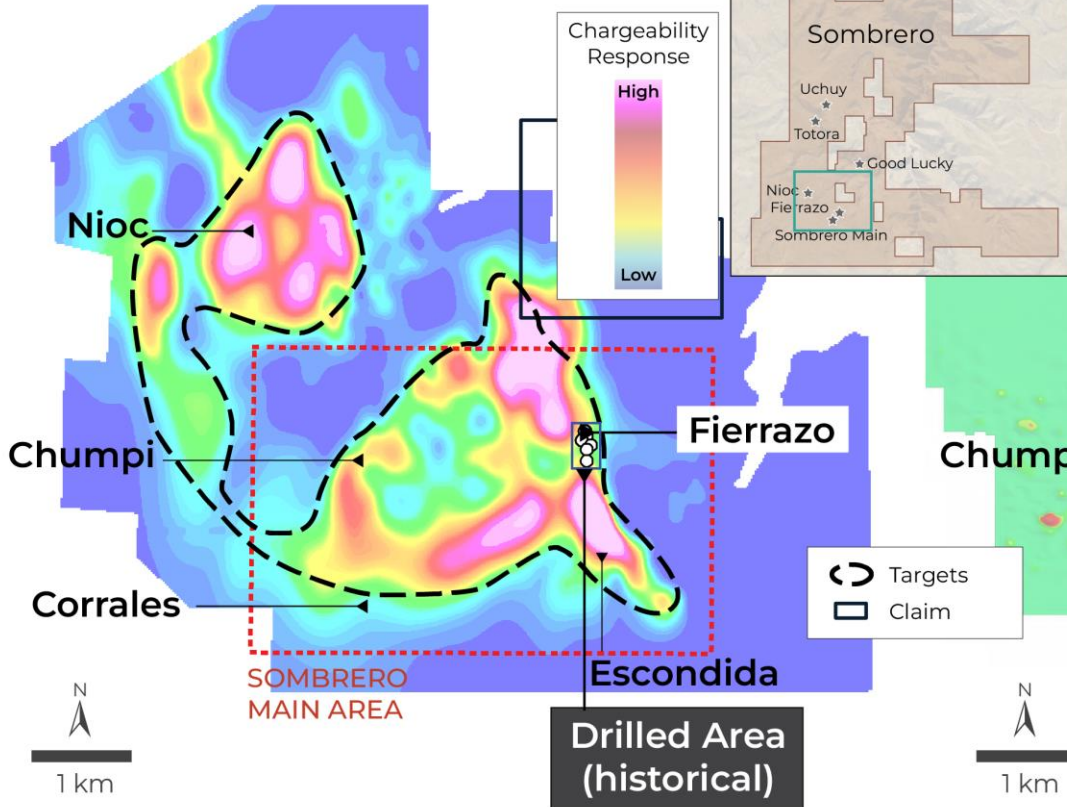

1. Porphyry-Style Alteration and Mineralization of the Middle Eocene to Early Oligocene Andahuaylas-Yauri Belt, Cuzco Region, Peru, Economic Geology, Vol. 98, 2003. Pg 1575-1605
2. The Eocene Coroccohuayco and Tintaya Copper Porphyry-Skarn Deposits, Peru: 5 Ma of Favourable Tectono-Magmatic Evolution, Metadatos INGEMMET, Pg 2
3. High-Resolution Geochronology of the Coroccohuayco Porphyry-Skarn Deposit, Peru: A Rapid Product of the Incaic Orogeny. Society of Economic Geologists, Inc., Economic Geology, v. 110. Pg 423-443

Kilometers of Overlapping Chargeability & Magnetics

Chargeability at 3,800 m elevation:

Targeting endoskarn and porphyry copper-gold mineralization

Magnetic analytical signal on surface:

Targeting high-grade, copper-gold exoskarn mineralization

- IP and magnetic surveys were conducted over 10 km of targets between Nioc and Sombrero Main target area: the above shows the extent of the chargeability and magnetic analytical signals on surface
- Surface mineralization has a distinct geophysical signature, which extends under cover

Selection of Surface & Drill Highlights at Sombrero

Over 10 km of geophysical targets with channel samples have identified the potential for **significant grade and tonnage**

Channel sampling highlights taken within various windows of outcropping mineralization:

- 232 m of **0.47% copper** and **0.13 g/t gold**
- 109 m of **0.67% copper** and **0.05 g/t gold¹**
- 99 m of **0.40% copper** and **0.10 g/t gold**
- 30 m of **1.86% copper** and **0.12 g/t gold**

Historical drilling* along a portion of the geophysical anomalies demonstrates **high-grade mineralization** that continues to depth and provides direct validation of the 10 km geophysical signature:

- 116 m of **0.42% copper** and **0.24 g/t gold**
- 90.4 m of **0.48% copper** and **0.05 g/t gold**

*2013 drilling completed by Aceros only assayed for iron, resampled by Auryn in 2019²

1. This interval is comprised of two reported intervals. The 25 m gap between the two intervals where bedrock could not be reached was assigned a zero value for both gold and copper grades
2. See Auryn news release dated June 13, 2019

Mineralized Historical Drill Core Supports Robust Model

Subsurface Mineralization Correlates with Geophysics

Fierrazo Target, Sombrero Project

Endoskarn – Oxide Mineralization Cascabamba Diorite Sill: Drill Hole FE-DDH-03B

30.4-51.4 m: 21 m of 0.50% Cu and 0.01 g/t Au Oxide Endoskarn Mineralization in Cascabamba Diorite Sill

At 33 m: 1.32% Cu and 0.03 g/t Au in Cascabamba – Hematite vein stockworks with malachite staining at their margins.

Exoskarn – Sulphide Mineralization: Drill Hole FE-DDH-03A

64-98 m: 34 m of 0.20% Cu and 0.09 g/t Au Mixed Sulphide Zone in Magnetite Exoskarn (Upper Mara)
Coincident Magnetic and Conductivity Responses

At 62 m: 1.35% Cu and 0.54 g/t Au massive magnetite with disseminated pyrite in sulphide zone.

No less than 5 m of $\geq 0.1\%$ Cu, maximum dilution 6 m (See technical disclosure on Auryn Resources, now Fury Gold Mines Ltd., news release dated June 13, 2019)

Drill Plan & Highlights: Sombrero Main Target Area

DIA* (environmental permit) allows for up to 49 holes to be drilled from 38 drill pads at Sombrero Main target area

Schematic Sections Through Sombbrero Main Target Area

Looking Northeast **Skarn target, mineralization across multiple stratigraphic horizons**

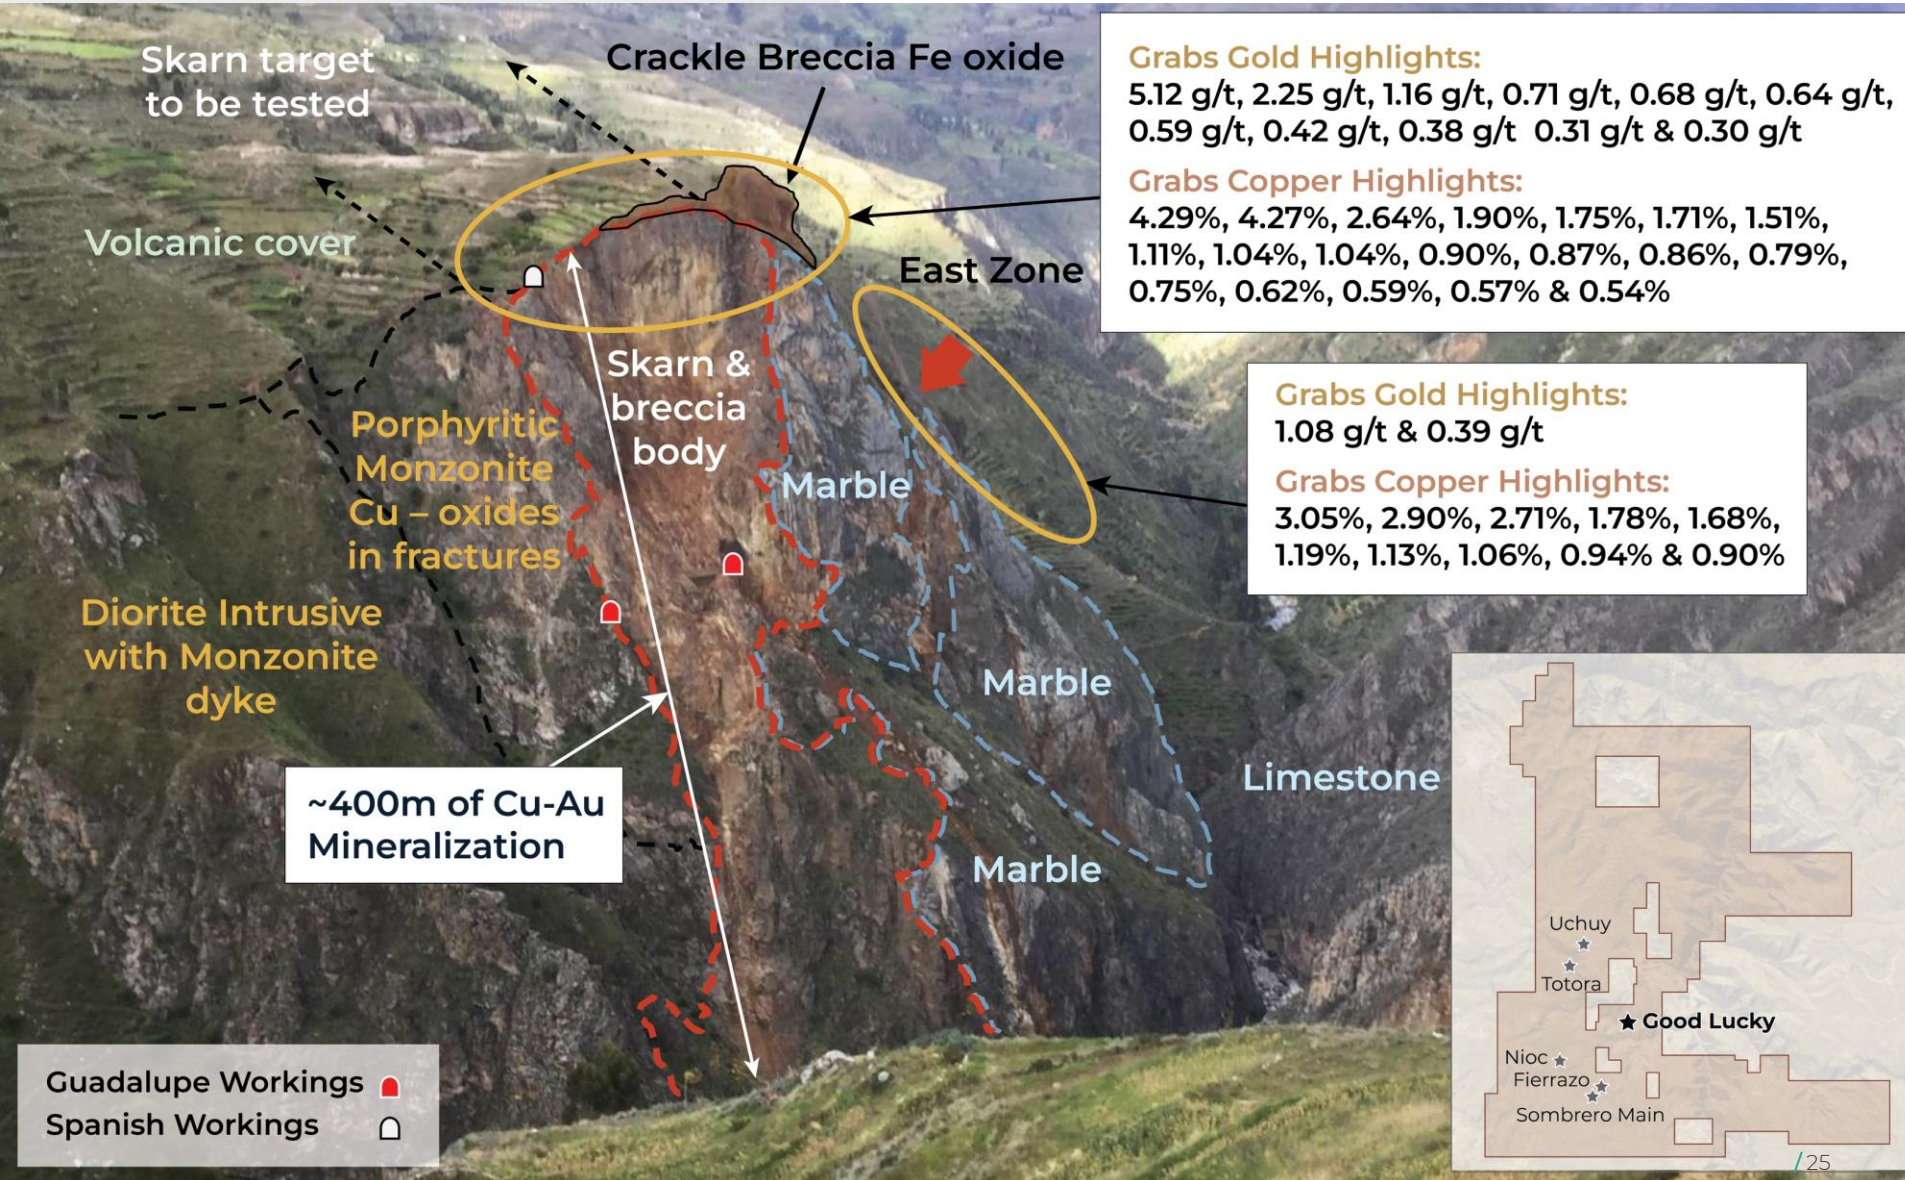

Looking Northwest

Skarn target, mineralization across multiple stratigraphic horizons

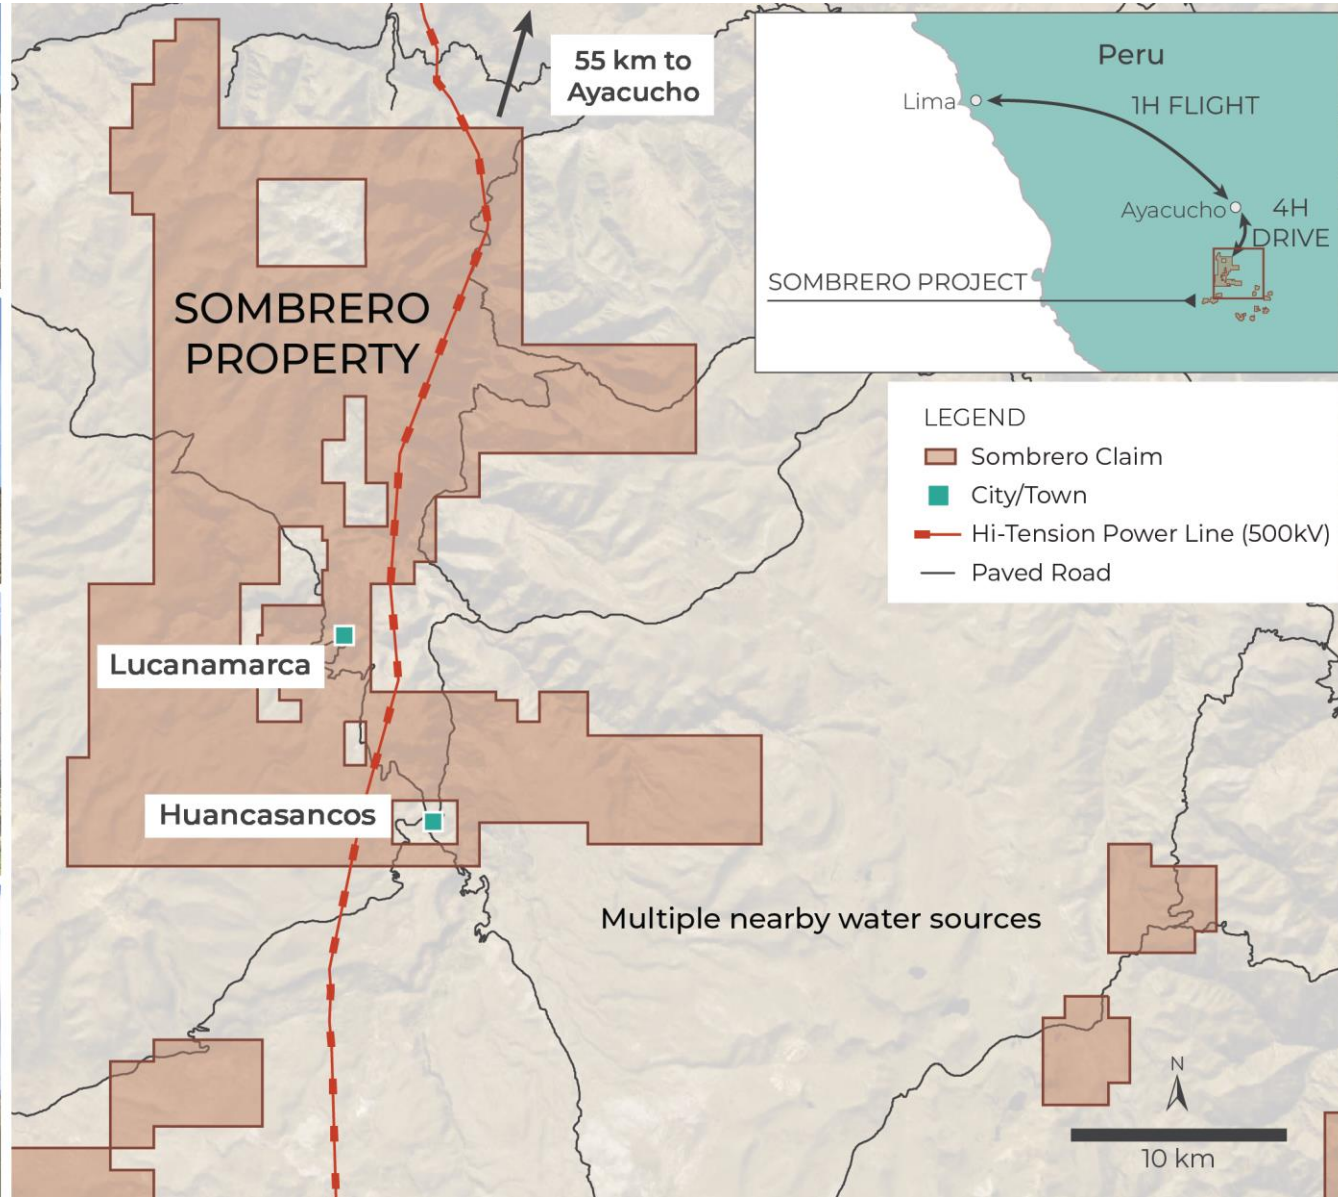

400-m Vertical Window of Potential Mineralization

Good Lucky Target, Sombrero Project

Exceptional Access to Infrastructure

Fully Permitted to Commence Drilling Activities

HUANCASANCOS:

- **Environmental permit (DIA)¹ in place** – allows for up to 49 holes from 38 drill pads at Sombrero Main target area
- Three-year renewable **social access agreement in place**
- **Start of Activities permit (IDA)² in place** – allows for the initiation of drilling activities.
- Working on additional social access agreements in the region

1. Declaración de Impacto Ambiental

2. Inicio de Actividades

2024 Disciplined Exploration Approach

- **Inaugural drill program** to test various skarn and porphyry targets within the Sombrero Main target area
- **Targets are supported by high-grade** surface sampling (including 109 m of 0.67% copper and 0.05 g/t gold¹) and coincident geophysical anomalies
- Initial phase to target mineralization **between 0 m and 300 m below surface**

1. This interval is comprised of two reported intervals. The 25 m gap between the two intervals where bedrock could not be reached was assigned a zero value for both gold and copper grades

Sombrero Project: Summary

Unique opportunity for **large-scale high-grade, drill-ready** advanced exploration targets

Multiple targets in district analog to several Major Mines

Significant **mineralization on surface and in historical holes**

Year-round accessibility

Established **three-year renewable social access agreement**, fostering ongoing sustainable social programs and job opportunities

APPENDIX

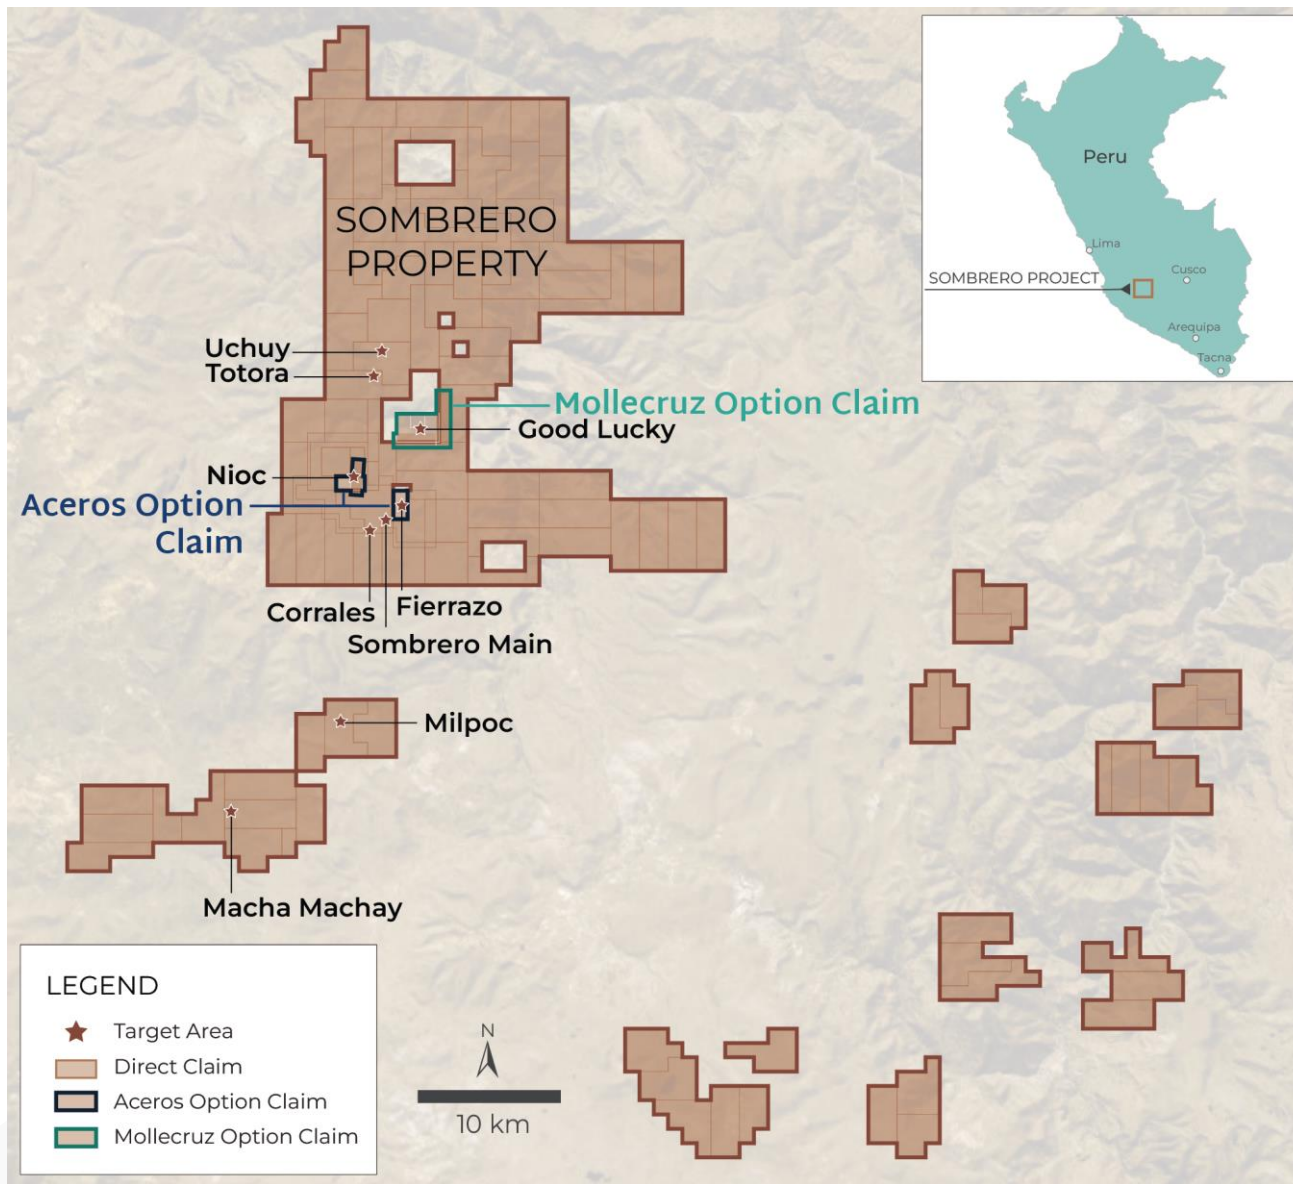

- | 34) Sombrero District: Ownership
- | 35) Aceros Option: Payments
- | 36) Mollecruz Option: Payments
- | 37) Sombrero Cluster: Combined Soils & Rocks
- | 38) MMG Limited: Ferrobamba (Las Bambas) Map with Pre-2022 Drill Results
- | 39) MMG Limited: Ferrobamba (Las Bambas) Cross section XS-2 with 2022 Drill Results

Sombrero Property: Ownership

Sombrero property covers approx. 100,000 hectares¹ which has been acquired through a combination of staking and option agreements

Ownership	Claims	Hectares
Direct*	114	100,800
Aceros Option	3	600
Molleacruz Option	4	1,300

*Sombrero Minerales S.A.C is Copernico's wholly owned subsidiary in Peru through which the Company directly owns its concessions

1. The total claim area is reported as 102,699 Ha; however, it is noted that there are overlaps within the claims. Following the removal of these overlaps, the effective area is ~97,000 Ha.

Aceros Option: Payments

Due Dates	Property Payments (US\$)	Property Payment Status	Work Expenditures (US\$)	Work Expenditure Status
December 13, 2018	\$140,000	Completed	-	-
December 13, 2019	\$60,000	Completed	\$150,000	Completed
Within 6 months of obtaining access	\$250,000	Completed	\$500,000	Completed
Within 24 months of obtaining access	\$350,000	Completed	\$1,500,000	Deferred
Within 36 months of obtaining access	n/a	n/a	\$3,000,000	Deferred
Total	\$800,000		\$5,150,000	

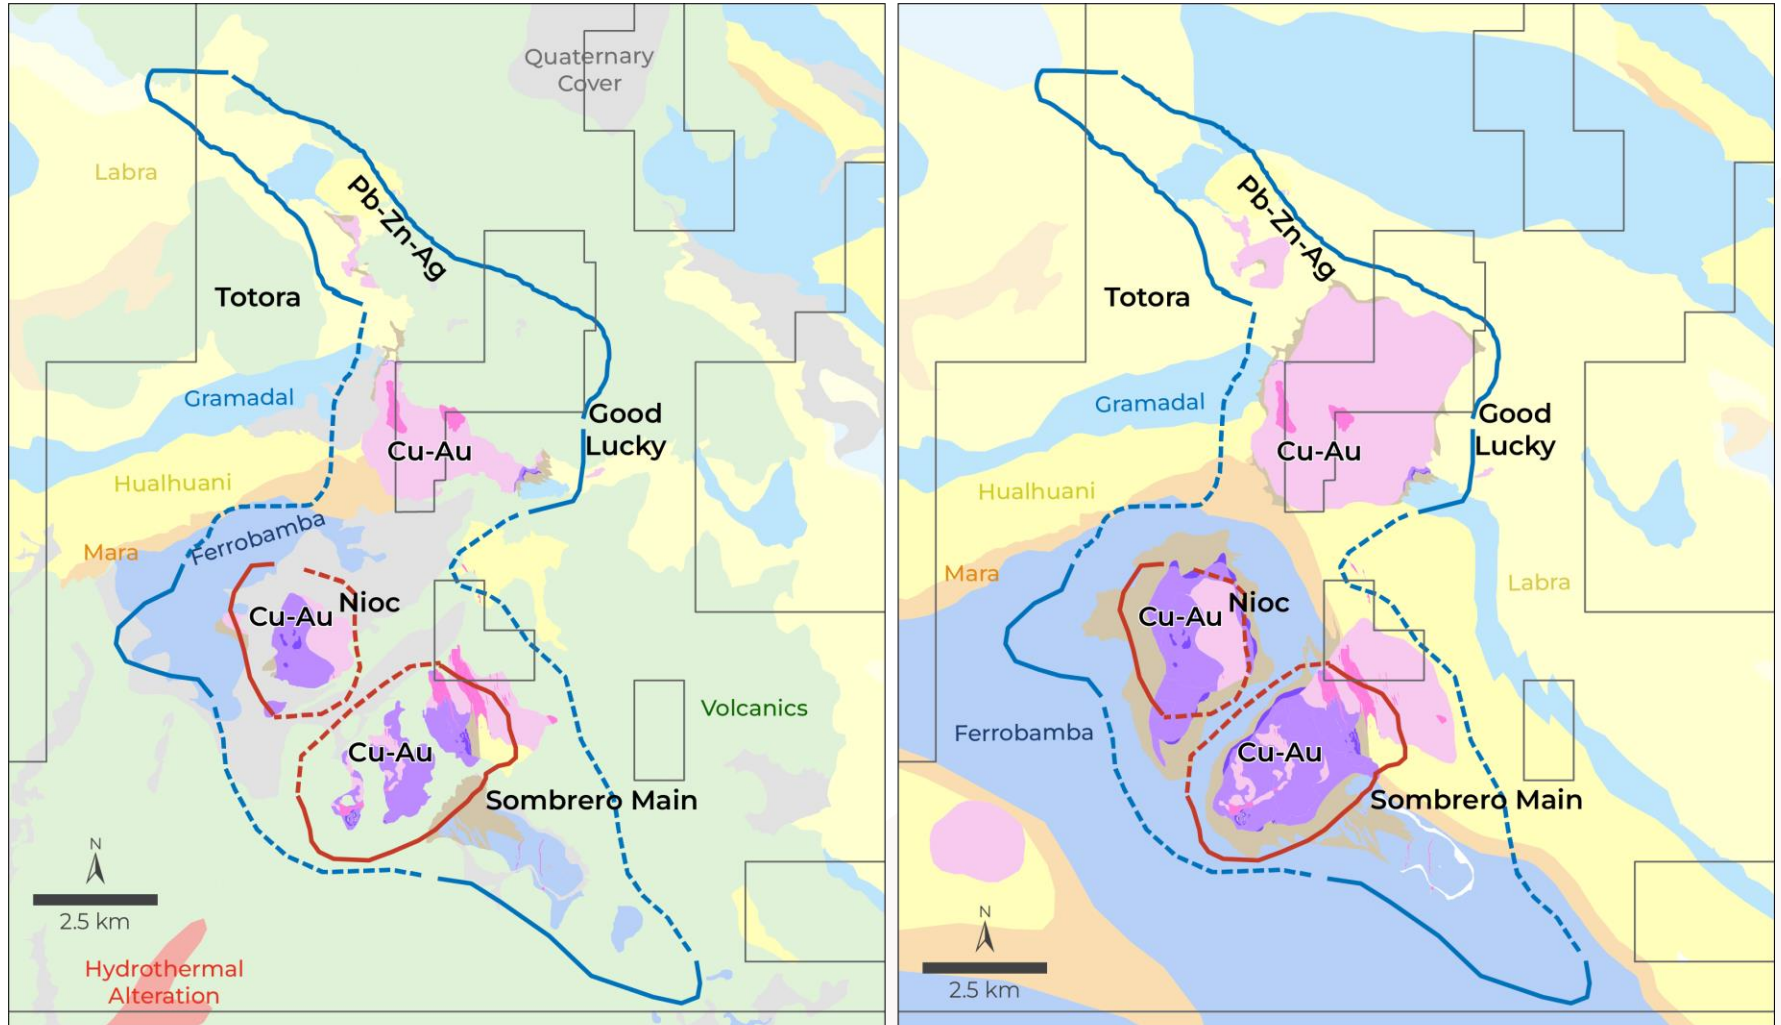

- If the option is exercised, a joint venture will be formed in which Coppernico will hold an 80% interest and Aceros will hold a 20% interest in these concessions
- In 2021, the Company amended the agreement to defer the work expenditure requirements dependent on access to the concessions, in exchange for an additional annual payment of US\$100,000 for the period that the option is in place

Mollecruz Option: Payments

Due Dates	Property Payments (US\$)	Property Payment Status	Work Expenditures (US\$)	Work Expenditure Status
June 22, 2018	\$50,000	Completed	-	-
June 22, 2019	\$50,000	Completed	\$150,000	Deferred
June 22, 2020	\$100,000	Deferred	\$150,000	Deferred
June 22, 2021	\$200,000	Deferred	\$500,000	Deferred
June 22, 2022	\$300,000	Deferred	\$700,000	Deferred
June 22, 2023	\$900,000	Deferred	\$1,500,000	Deferred
Total	\$1,600,000		\$3,000,000	

- The Company may acquire a 100% interest, subject to a 0.5% net smelter royalty fee, through a combination of work expenditures and cash payments
- On May 20, 2019, the Company formally declared the existence of a force majeure event thereby deferring the Company's obligation to make the June 2019 property payments and any subsequent property payments and work expenditures for a maximum of 24 months from the declaration date
- On March 1, 2021, the Company agreed with the owner to extend the force majeure declaration for another 24 months and paid US\$50,000 as consideration for the June 2019 property payment. As a result, the Company was able to continue deferment of the remaining property payments and work expenditures until May 20, 2023
- On May 15, 2023, the Company amended its option agreement and extended the recognition of the force majeure status until such time an agreement or agreements are in place that allow the Company to access the concessions in order to carry out exploration work
- A payment of US\$5,000 was confirmed and paid at the time of amendment and will be paid annually under the option agreement until access to the concessions is achieved by the Company
